ABOUT

With 6 years of experience as a 3D Game Artist, I am passionate about creating high-quality assets and immersive experiences for video games. My expertise spans industry-standard tools including Zbrush, 3Ds Max, Substance Painter, Blender, Maya, and Unreal Engine.

Beyond asset creation, I have actively contributed to the artistic vision of projects, collaborating closely with teams to define and maintain visual styles.

I am a proactive problem-solver, eager to implement advanced techniques for asset optimization and integration, and I thrive in environments that encourage creative challenges and ownership.

Additionally, I have provided support on the Epic Games Forum, where I am recognized as an Epic Games Partner.
